SET 1 Do NOT wash your brush until you're finished with the row.

Squeeze the color & number of chips indicated below onto your palette. Mix well. Paint here.

→ Add the new chips shown below to what was left on the palette & paint here.

→ Continue the same method.

→ Continue.

→ Finish this set and then wash your brush for next set below.

INSTRUCTIONS

- There are no "right" colors - other artists' journals may look different.
- The goal is to learn what *happens* when pigments combine, not to make formulas.
- Each dot represents a *chocolate chip sized* measure.
- Squeeze a chip for each dot. Try to make them the same size and NEVER estimate by making larger blobs for more than one.
- Always mix on your palette, not on this sheet.
- Use a medium/small brush.
- When you see partial chips indicated, don't try to squeeze out a smaller bit, just place a regular chip off to the side, and use your brush to get the smaller amounts.
- If you make a mistake, just write down what you did and keep going.
