

End

Moving from a dark color to light is easier if you use a small amount of your dark & mix into a chip of white.
(Lighter colors may need yellow along with white.)

Name:

COLOR maze

Start➔

Mix the first color. Then create new colors that connect one color to the next by making a mix of the two. For a challenge, try making a continuous blend between each color.

This pink isn't regular red & white

When moving from a dull color towards a bright one, try using 2 brushes.

Don't use brown here. What color will darken and dull a red-based color? (hint: look ahead)
