
CREATIONS

For students in 3rd & 4th years

Practice drawing cylinders. You should set up your own still life using cylindrical objects of bottles and bowls, and do a detailed sketch. Find a good working space and add lighting so your still life can be shaded well.

Make sure that you use a real plate or circle to visualize your cylinder bases. Close one eye and move the circle up and down so you can see the change in perspective.

Draw the entire “secret plate” underneath every object.

Steps:

- 1 Find objects and set up still life
- 2 Draw 2 or 3 charcoal sketches taking only 5 minutes each - full sheet of paper
- 3 Draw guidelines sketch very lightly
- 4 Continue by adding details and shading, making the lines bolder as you go
