

Notice how the tips of the tentacles can define a shape that is a bigger shape than it seems. The top shape is an AIR shape.

Notice the large AIR shape at the left. How big is it in comparison to the green shape? If you took out the pink flowers, can you see a green triangle?

Notice how the AIR shapes on each side of the bird's neck look like other things:

- another bird on the left.
- a house on the right.

Notice where the horizon line touches the edges of the Frame. Is it halfway, or just below halfway?
