

CREATIONS

For students in 3rd & 4th years

Journal Painting

Overview: If you have done this project before, this is your opportunity to improve. You can bring a new level of skill and understanding to your Journal Painting.

You are like a creative weight lifter. Today you are going to lift a bigger set of artistic weights.

Working on a larger canvas is encouraged if possible.

Think about what you can do to change your approach and ideas for the project. What do you want to say through your artwork?

Remember to use your canvas pencil

Create sketches, and do plenty of hatch shading.

Do not use any white in your paints for the main color layer. You don't want to cover up your sketches, but softly color them.

Next week you can add more color and even some opaque colors using white.

Alternatively, the same basic ideas of sketching and journaling can be done on watercolor paper and using watercolor technique over regular graphite pencil drawings.
