

CREATIONS

For students in 3rd & 4th years

Watercolor Painting

Overview: You'll create a watercolor painting using your own ideas for subject matter and reference.

Step 1. (10 minutes) Plan your painting. Find a reference you like and draw some thumbnails to figure out your composition. Since it's paper, you can make this a square or rectangle.

Step 2. (15 min) Draw guidelines in graphite pencil on your watercolor paper.

Step 3. (5) Set up for working in watercolors.

Step 4. Paint the work using the drop-in technique or regular watercolor technique. Listen to the demos for review and the 2 most important insights about watercolor: 1. Brush doesn't touch the paper; 2. Leave it alone, because wet watercolor isn't finished.
