

Teacher Prep Instructions:

Cut out the outline of this cube (shown in gray line) to use as a tracing template. Then use a pencil or pen to poke a hole in the center - where the dot is. Students will draw the black lines on their own traced box from the corners to the dot.

Also cut along the dotted line below to use the bottom section as a worksheet.

EXPERIMENT #1

Fill in the white side of this box with a grey oil pastel.

Does it look like a realistic red shadow?
