

The details in the antelope may look complicated at first, but if you look at the biggest shape first, it gets easier.

The head is shown in turquoise over to the right. That's just the big shape, but you can see how much simpler it is. It looks like a tall shield.

Notice how the center of the head shape is also the center fold line going up and down. See where the side to side line is?

FOLLOW THESE STEPS:

- 1.** Draw the head shape
- 2.** Draw the antlers
- 3.** Draw the ears
- 4.** Draw the eyes on the sides, right where the side to side fold line is
- 5.** Draw the lines around the shapes on the face and the nose

Finish with the mouth!
